

LOOKING TO ENHANCE YOUR BUSINESS?

INSTITUTO DE GEOFÍSICA

We specialize in geophysical and geological studies for the exploration and modeling of mineral, geothermal, and water resources. Our services include characterization of metallic and non-metallic minerals, rock dating studies, water quality and environmental studies; environmental impact assessments, remote sensing studies. We assess risks from natural hazards, monitor seismic activity and design professional development programs for your staff, among others.

With our cutting-edge research laboratories, comprehensive geophysical services, and highly skilled professionals, we have the expertise to solve problems and identify opportunities for your business.
